 RESA - Resources and Engineering Skills Alliance

The Skills Alliance is an Industry backed specialist Not-for-Profit with a strategic focus on skills and capability in the resources sector and its supply chain.

We work with clients and stakeholders to identify key factors influencing workforce efficiency and develop effective workforce plans that drive productivity and safety.

We conduct research and work collaboratively with industry to develop and manage projects to deliver improved workforce productivity, safety and capability outcomes.

Objectives

- To build skills, capability and capacity that grows the Australian resources industry and it's supply chain.
- To provide industry with support and training to build their business and increase their safety and productivity.

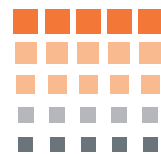

Methodology

Established in 2007, the Skills Alliance has almost 10 years' experience providing point and comprehensive skills, workforce planning, and capability development solutions and services. We have an experienced team that works across a range of industries with great depth in resources and with a wide range of companies and stakeholders.

We are experienced in the design and delivery of programs that support the development of small-to-medium enterprise's capability in the resources and related sectors and the supply chain, and facilitating collaborative skills programs for industry.

Our hands-on approach supports companies identify and build capability and capacity using the following key capabilities.
